

AGREEMENT FOR HYDROGRAPHIC SURVEYING SERVICES DEMONSTRATION

PARTIES: SPH Engineering, 1500 Panther Loop, Pflugerville, TX 78660 (ASPH@)  
email: kozolins@sphengineering.com

Jupiter Inlet District, 400 Delaware Avenue, Jupiter, FL 33458 (AJID@)  
email: jchaison@jupiterinletdistrict.org

DATE: The date of this agreement is the date it is executed by the last party to sign.

SCOPE OF WORK: Generally, the work consists of SPH Engineering conducting a demonstration of a hydrographic surveying system operated from a drone to be flown over the subject area to collect bathymetric data in digital format and furnish a bathymetric contour map. The survey will be made of the near shore area at the mouth of the Jupiter Inlet in Palm Beach County, Florida. The survey limits and the location and spacing of the transects will be approved by JID. The deliverables are the collected data furnished to JID in the form of point cloud data sets and a contour map. The data and map will be the property of JID, for its free use including making it available to interested persons and the public.

PURPOSE: The purpose of the survey is to provide JID with evidence for its consideration regarding whether the equipment and its software, and the data it collects, are feasible for use in acquiring the data periodically needed for tracking the depth of water in the subject area.

EQUIPMENT: All equipment, software and supplies required for the demonstration will be furnished by SPH, at the worksite, including a suitable aerial drone to conduct the survey, all at no charge to JID.

OBLIGATIONS OF JID: JID will provide access to the south jetty at the inlet, and necessary parking space for SPH's equipment. Payment by JID to SPH is due when the Work is complete and all deliverable components delivered and accepted. If the demonstration is completed, JID will have no obligation other than to pay the charges for Survey Planning and Data Processing, Data Interpretation Services, and Logistical Expenses in the amount of \$2,424.00 as shown in SPH Engineering Quote#Q\_8231 dated January 5, 2026. If the demonstration is not completed and deliverables are not supplied, JID will have no payment obligation.

TIME: SPH will arrange for all necessary equipment and persons to operate it to be present for the demonstration on dates agreed upon by the parties, during the month of February, 2026. SPH will arrange to be present for 3 days, subject to weather and other conditions. JID acknowledges that the conduct of the survey and effectiveness of data collection are strictly weather dependent. Inclement weather may prevent conduct of the survey, and necessitate its postponement or cancellation. If canceled, SPH is not obligated to return at another time unless it chooses to do so.

LIABILITY AND INSURANCE: SPH assumes all liability for any claim or demand related to the Work. SPH agrees to be solely responsible for the safety of its own equipment and other property. SPH further agrees to defend JID and hold it harmless against any claim for damages to persons or property arising from or related to the Work. Prior to commencement of the Work, SPH will furnish a certificate of insurance in amount to be approved by JID.

MISCELLANEOUS: This agreement is made in Palm Beach County, Florida, and is to be interpreted and enforced according to Florida law. Any legal proceedings regarding this agreement shall be conducted in Palm Beach County, Florida. Notices shall be by email, using the addresses for the parties shown above.
